BICYCLE

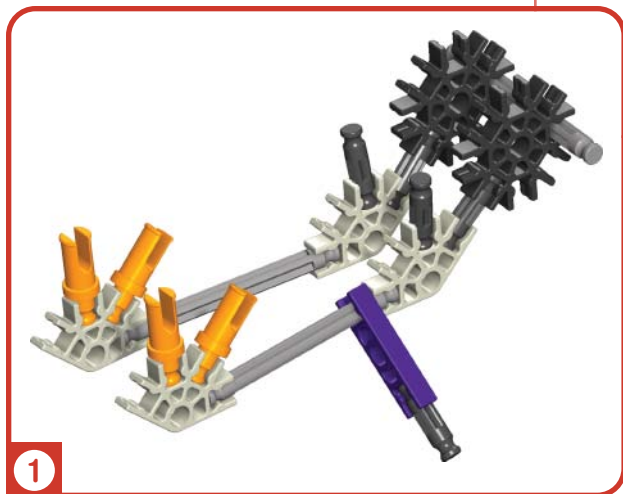

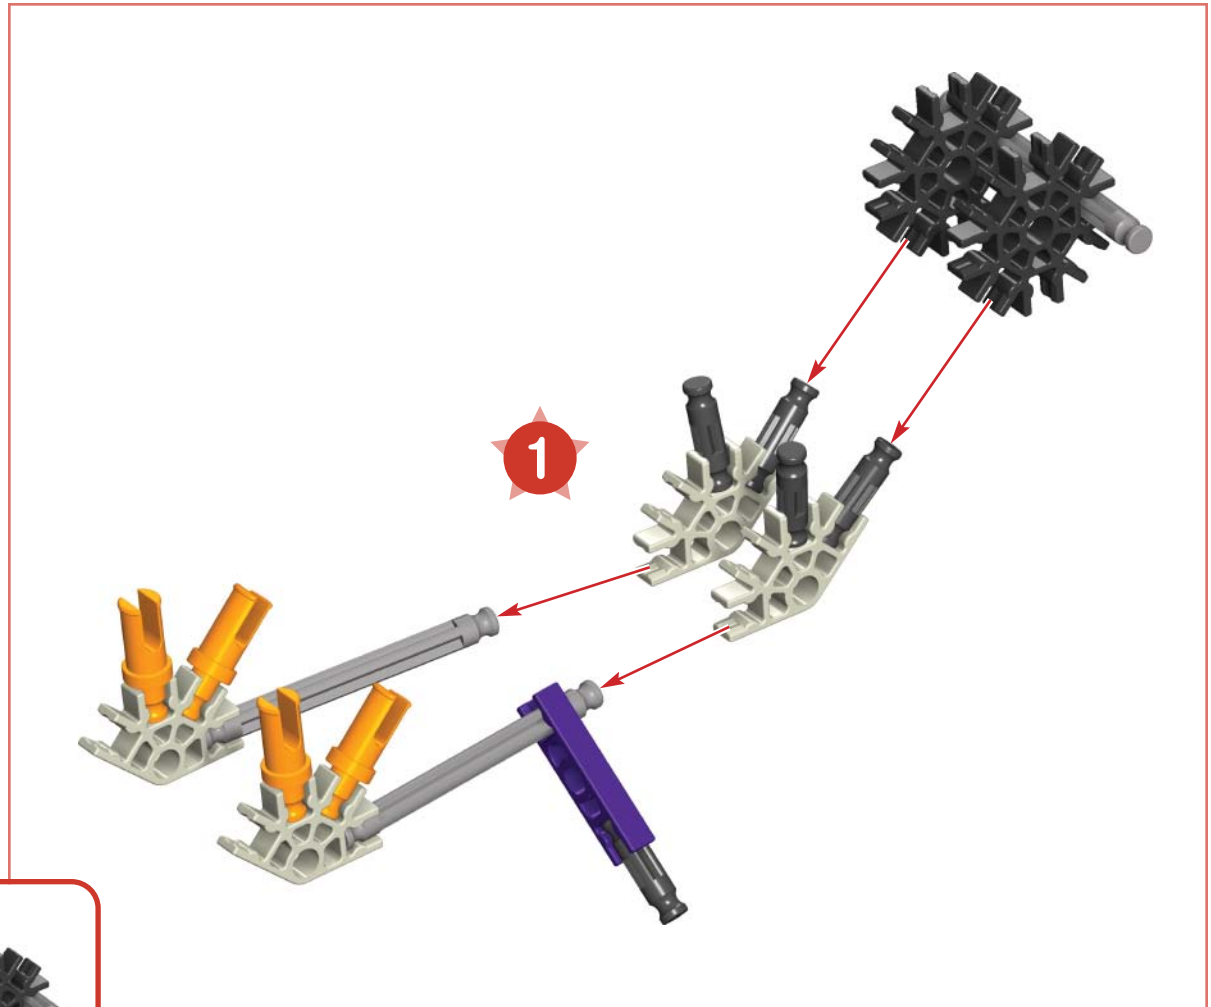

A detailed LEGO Technic model of a camera mechanism. The model is constructed using a variety of LEGO parts, including yellow and red Technic beams, grey Technic bricks, and black gears of different sizes. A large black wheel with a five-spoke hub is prominent in the foreground. The mechanism is built on a base of grey bricks, with yellow beams forming the main structure. Red beams and gears are used for internal mechanical components. The overall design is complex and functional, typical of advanced LEGO Technic builds.
